## PROJECTS

- **Multiple gaming website (08/2022 - 10/2022)**

This project offered a centralized platform where users could explore, play, and engage with 10 different games across genres with a playful frontend features.

- **Smart Dairy (06/2023 - 09/2023)**

A digital diary where users can log their thoughts, moods, and activities with emoji-based emotion tagging and daily color highlights. Supports uploading photos and videos for each entry, along with a calendar view for tracking mental and emotional patterns over time. Includes a secure login system and a visually appealing, user-friendly interface designed with Figma

- **women period tracker (08/2024 – 11/2024)**

A platform to help women track their periods, pregnancy symptoms, and mental health in one place. Users can log daily symptoms, emotions, and health details, along with personalized reminders and calendar integration. The app promotes self-care and wellness with an intuitive and supportive user experience.

- **Mental health chatbot (07/2024 – 10/2024)**

A conversational chatbot designed to provide emotional support, mood tracking, and self-care tips to users. It engages users in a friendly, non-judgmental way, offering personalized responses, breathing exercises, and daily affirmations. Built to promote mental well-being through accessible, empathetic interaction.
